

ShowWire

As part of our **commitment to investing in environmentally-friendly products**, we recently launched 'ShowWire', our **new, reusable, plug together** exhibition electrical wiring system.

Quick to install and remove, infinitely versatile and environmentally-friendly (all cabling being re-used rather than recycled after each event,) 'ShowWire' is a **user-friendly, exhibitor-friendly, cleaner-friendly and environmentally-friendly system that's easily integrated to our 'Octanorm' or basic shell scheme systems**. Successfully tried and tested on-site, Organisers of exhibitions of all sizes can now appoint Showlite confident in the knowledge that they're positively demonstrating their own company's environmental credentials.
